

Whether watching the ceremony from afar or years down the track, at Pauls Productions we strive to produce videography that perfectly captures the emotion and essence of the day.

### *We cater for both indoor and outdoor locations*

Catering for both indoor and outdoor, we always use 2 or more cameras to capture the attendees, treasured items, family videos, photo slideshows and rituals to produce a customised experience and memory of your loved one's life.

### *We do much more than just a fixed camera live streaming*

While many facilities offer basic live streaming services, or recordings, these are usually from fixed cameras. This means that you only see what the camera is pointed at, with minimal operator control or follow-up editing.

## *A celebration of life*

When it comes to creating a memento you can share with family, friends and future generations, there are various video options available:

### *"Your life story" montage video*

Need some help bringing together a lifetime of memories? This moving tribute of images and video is professionally edited, with music - and ready to play at a funeral, memorial or other function.

### *Professional video recording*

Our experienced camera operators can record the service (indoor or outdoor) using 2 or more high quality cameras. You can also choose to capture tributes from family and friends following the service or at the wake.

### *Live stream video worldwide*

Share your service with family and friends via online - in real time.

### *Professional video production*

Following your event, we offer a full video production service including up to 7 hours of editing time, colour correction, video insertion and audio.

### *A celebration of life keepsake*

Video files are uploaded to shareable online folders for you to keep and share with others. We can also produce a beautiful USB drive, customised with you loved one's name. (Minimum quantities apply).

# *In Loving Memory*

## *Professional video services for funerals and memorials*

## Cherish their memory, celebrate their life

Our deepest sympathies go out to you and your family. At Pauls Productions, we understand losing someone you love can be overwhelming.

Capturing these defining moments is even more important these days. A funeral or memorial service is a way to pay our respects - and sharing memories with family and friends can bring comfort during the grieving process.

For family and friends unable to attend the ceremony, paying their respects and getting a sense of closure is difficult. Our beautiful video productions aim to include them in the proceedings.

*"Those we hold closest to our hearts never really leave us. They live on in the love they brought to our lives."*

With a few simple steps,  
we tailor a service to  
suit your needs
